About Me

I recently graduated from the University of Douala with a degree in Computer Science. At 23, I'm passionate about full-stack development, specializing in building front-end applications using ReactJS and back-end systems with Node.js. I'm looking to join a dynamic team where I can grow my web and mobile development skills while contributing to exciting, impactful projects.

Educational

2018-2019   **Makepe High School**
It's where i got my bachelor's degree

2021 - 2024   **Computer Science Degree**
I graduated with a bachelor's degree in computer science from the University of Douala in 2024.

Experiences

React Native developer

SAHEL BTP   **May 2024**

I develop mobile applications using React Native and Firebase, utilizing cloud functions, Firebase-admin, FCM for notification, and so on. I also worked on web projects using the ReactJS framework.

Frontend Developer and web integrator

Adaa Group   **Sept 2023 - Nov 2023**

From 23 August to 23 November 2023 i worked as a Frontend Developer and Web Integrator at Adaa Group, developing websites using React , Nextjs and TypeScript, Tailwind CSS, integrating web pages with HTML, CSS and Javascript and also discussing how to organize backend code.

Frontend Developer - Intership

Ova Consulting   **Jun 2023 - Sept 2023**

In the months of June and July 2023, I did some academic internships at Ova-Consulting, where i learned enough to work in a team using things like Slack and Trello. I was working on Reactjs and Typescript projects. And also integrating web page using html and css.

Projects

I have also worked on several freelance projects, including:

Prodf
From February to April 2024 i built a mobile app that helps to easily manage pedagogic resources by using react native and Firebase.

Miazite
Miazite is a mobile app that helps service providers find jobs based on their skills. I developed it using React Native and Firebase from July to September 2024.
